### EVENT SUMMARY

Stating event marking the destruction and subsequent desertion of the town of Haven Hills, Alabama. Class Ten Apocalypse. Casualties: 10,835. Complete series of Midgard's events can be found in sequence IPB-MID. See Case File IPB-ROX-00AL for other disasters containing Roxxon Corp.

The storm didn't become a hurricane until passing west of the Florida Keys where a sharp left turn sent it heading straight toward Alabama. That gave residents and local officials less than two days to prepare.

6,589 civilians tried to use the Roxxcart Public Mall Facility as a shelter whilst evacuation shuttles were provided by the company. Other town members tried to flee or took cover at home.

At arrival it became a class S-5 tropical storm with speeds above 270 km/h. Combined with class 5 storm surges and multiple flash flooding lasting up to 19 days.

Eventually the Roxxart Retail Store and its surrounding districts were by the completion of the event wiped out by IPB-TER-342, deemed to be inescapable.

EVENT CAUSES: IPB-MID-2020, IPB-MID-2036, IPB-MID-2042  
(FURTHER CASE FILES CAN BE FOUND IN IPB-TER-9045)
